ABOUT ME

Motivated Computer Science Engineering student with hands-on experience building full-stack web applications and data-driven systems using Java, Python, and modern web technologies. I enjoy turning ideas into practical applications and have worked on projects involving web development, machine learning, and cloud deployment. I have experience with technologies such as Spring Boot, React.js, Docker, and AWS. I'm a quick learner who enjoys solving problems, exploring new AI technologies such as GANs (Generative Adversarial Networks), and working collaboratively to build useful software.

EDUCATION

B.Tech in Computer Science Engineering
Koneru Lakshmaiah Education Foundation (KL University) 2023 – 2027 CGPA: 8 / 10

TECHNICAL SKILLS AND INTERESTS

Programming Languages: C, Java, Python

Databases: MySQL

Web Development: HTML, CSS, React.js

Backend Frameworks: Spring Boot, REST APIs, Backend Development

AI/ML: Machine Learning Fundamentals, Generative AI (Beginner)

Cloud & DevOps: Git, GitHub, Docker, AWS (Certified Cloud Practitioner)

Soft Skills: Communication Skills, Team Work

PROJECTS

Online Car Rental System

Full-Stack Web Application

- Developed a web-based car rental platform for vehicle booking and reservation management.
- Implemented booking workflows, user management, and backend database operations.

Plant Disease Detection

Machine Learning-Based Image Classification System

- Built an AI/ML-based solution to identify plant diseases from leaf images.
- Integrated trained machine learning models for automated disease prediction.

HACKATHONS

Plant Disease Detection – Hackathon Participant (Academic Hackathon, On-Campus)

- Developed an AI/ML-based plant disease detection project demonstrating skills in rapid prototyping and team collaboration.

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Automation Anywhere Certified Advanced Automation Professional
